PREFACE

Professor Miroslav Fiedler, an outstanding Czech mathematician and Editor-in-Chief of this journal for over 30 years, passed away on November 20, 2015. His collaborators worldwide continue to remember him for his brilliant contributions to linear algebra and graph theory; many more have known him also as an excellent chess player, as one of the leading organizers of the Mathematical Olympiads in Czechoslovakia, as a laureate of numerous medals, prizes and other awards, and as a prominent figure of the Czech scientific life. This special issue was started in June 2015, in the hope of commemorating his 90th birthday on April 7 of this year. Sadly, he will not see it.

This issue is now dedicated to the memory of Miroslav Fiedler, in remembrance of not only his mathematical achievements, but also of his kindness and generous friendship.

Miroslav Engliš
Editor-in-Chief
Czechoslovak Mathematical Journal
